- Patients and the public are involved and engaged at all stages of research. Their contribution is valued and its impact is recorded.
- All policies, systems, and practices are applied through an equity lens
- Some policies, practices are applied through an equity lens. Additional support to apply that more widely would be welcomed.
- Identification of health inequalities is straightforward, but application of an equity lens in practice is challenging
- Health equity is important, but there is uncertainty about its relevance to a given piece of work
- Health equity and health inequalities are confusing concepts
